Education  
Grant  
Program

## Medical Education Grant Mission

At Vertex, we understand the important role that educational programs play in enabling healthcare providers at all levels to improve their skills and knowledge, with the goal of improved patient outcomes. We hope to advance these goals by providing support to a wide range of educational initiatives. Our grant program is focused on supporting high-quality, balanced and independent projects, programs and activities in the therapeutic areas in which the Company has focused its research and development efforts, including Hepatitis C Virus (HCV) and Cystic Fibrosis (CF).

## Submitting a Medical Education Grant Request

In order to thoroughly evaluate each grant request, we require the following information to be submitted:

- Formal letter of request on requesting organization's letterhead
- Detailed description of the activity to be supported, including:
  - a proposed program agenda
  - learning objectives that the program will accomplish
  - a description of the evaluation report and/or outcome assessment
  - comprehensive, detailed line item budget
  - Tax ID (if applicable)

Grants are to be submitted through our online process. Please go to: [www.vrtxmededgrants.com](http://www.vrtxmededgrants.com)

The Vertex grant committee usually reviews each request within 45 days of receiving all required documentation. You will be notified by email of the committee's decision.

## Organizations We Support

The organizations from which we will consider grant proposals for specific programs or activities include:

- Accredited providers of continuing medical education
- Healthcare institutions
- Non-profit organizations whose mission is to promote patient advocacy and education

We do not provide educational grants to individuals.

No grant provided by Vertex is conditioned in any way on the use, purchase, prescription, or recommendation of any current or future Vertex product.
